<sup>1</sup>Broadband service charges not included. Offer expires 1/31/05. Monthly rate includes direct-dialed domestic calls and calls to Canada. International calls are billed at additional per-minute rates and may have different feature capabilities. A \$29.99 service activation fee applies. Other charges may apply. Customers who disconnect Service must return equipment associated with Service in order to avoid \$29.99 disconnect fee. Minimum system requirements apply, DSL or 2-way cable. Internet access required. Service does not support certain directory services, direct dial calls outside the U.S. and Canada, operator assisted, pay services or third-party billing (except calling cards or prepaid services). Other restrictions may apply. Service will not function during a power or broadband service outage and is not compatible with home security systems. Service's 911 Emergency Dialing operates differently from traditional 911 Service. To insure correct emergency call routing, the Service Address provided to us MUST correspond to the physical location of your AT&T CallVantage<sup>SM</sup> Service phone.

<sup>2</sup>**Savings do not include charges for broadband services.** As compared to the lead end to end offers of MCI, Sprint, Verizon, SBC, Qwest and Bell South as of 9/8/04. Savings result because AT&T CallVantage Service customers pay lower monthly service fees and lower Federal Excise Tax, and do not pay Federal USF and FCC Line Charges. Savings may be higher dependent upon state and carrier.

See the [FAQs](#) and [subscriber agreement](#) for additional terms and conditions.

<sup>3</sup>Savings based on weighted average of calling to all countries, compared to the lead plan of AT&T as of 10/1/04. Calls terminating on mobile phones or other wireless devices may be charged additional per-minute rates and are not included in stated savings.

<sup>4</sup>Broadband service charges not included. Monthly fee includes direct-dialed calls within your local calling area. All other calls are billed at additional per-minute rates. A \$29.99 service activation fee applies. Customers who disconnect Service must return equipment associated with Service in order to avoid \$29.99 disconnect fee. If a long distance number or non-local number is used for the Locate Me, 3-Way Calling or Calling Forwarding Features, charges will be applied. Other charges may apply.
